

ARCY

LITEPAPER

The Community Mascot Inspired by the Arc Ecosystem

“Every Chain Has A Community. Every Community Needs A Mascot.”

Version 1.0 • Community Draft • July 23, 2026

Disclaimer

ARCY is an independent, community-driven project inspired by the Arc ecosystem.

ARCY is not affiliated with, endorsed by, sponsored by, or officially connected to Arc, Circle, or any other company, foundation, or trademark holder referenced in this document.

This document is provided for informational and community-organizational purposes only. Nothing in this document is financial, investment, legal, tax, or accounting advice, and nothing in it should be relied upon as such.

This document makes no promises, guarantees, or predictions regarding price, liquidity, exchange listings, or future value of any token. Digital assets, and community-driven tokens in particular, are highly speculative and can lose all value.

Nothing in this document constitutes an offer or solicitation to buy or sell any security or investment product in any jurisdiction where such an offer would be unlawful.

Contents

1. Vision

Every blockchain that survives its first cycle eventually develops more than technology — it develops culture. Ethereum has communities. Solana has communities. Base has communities.

Arc deserves one too.

ARCY exists to become a recognizable community mascot inspired by the Arc ecosystem — a rallying point for the people who show up around a network long before that network needs them to.

2. Why ARCY Exists

Infrastructure brings builders. Liquidity brings traders. Culture brings everyone else.

Thriving blockchain ecosystems are consistently supported by more than their core protocol — they're supported by active communities: creators, artists, educators, moderators, and everyday participants who turn a technical project into a living network.

ARCY aims to encourage that culture through community participation, original content, education about the Arc ecosystem, and creative engagement — not through price speculation.

3. The Story

When Arc processed its earliest transactions, something unexpected happened — at least in the story the community tells.

A spark escaped the chain. Powered by stablecoin energy, driven by curiosity, shaped by builders watching the network come alive, that spark became a character.

ARCY was born — not issued by an institution, not created by a foundation, but adopted by the people who wanted the Arc ecosystem to have a face.

It doesn't belong to a company. It belongs to whoever shows up to build it.

4. Mission

The mission is straightforward:

- Become a recognized community mascot inspired by the Arc ecosystem.
- Support builders shipping on or around Arc.
- Support creators making original art, memes, and media.
- Support education that helps newcomers understand the ecosystem.
- Support adoption through genuine community activity, not artificial hype.

5. Core Values

Community First

Every major decision is evaluated by whether it strengthens the community, not whether it moves a chart.

Transparency

Open communication, clear documentation, and honest expectations — including about risk.

Creativity

Memes, art, animation, education, and community events are the primary output of the project, not a marketing afterthought.

Respect

Respect for developers building the underlying chain, for users of the ecosystem, and for the broader crypto community.

Security

Promotion of safe wallet practices and active discouragement of scams, impersonation, and phishing carried out in ARCY's name.

6. Brand Identity

Attribute	Detail
Mascot Name	ARCY
Ticker	\$ARCY
Primary Colors	Primary Blue, White, Silver
Theme	Electric stablecoin energy; community spirit
Tone	Playful, transparent, builder-friendly

7. Ecosystem

ARCY intends to contribute to the broader Arc-adjacent community through initiatives such as:

- Educational content about the Arc ecosystem and stablecoin infrastructure generally
- Community events, AMAs, and builder spotlights
- Meme campaigns and creator competitions
- NFT artwork and sticker packs produced by community artists
- Community governance experiments
- An ambassador program for active contributors

8. Token Overview

Field	Detail
Token Name	ARCY
Ticker	\$ARCY
Network	Arc network
Launch Method	Intended to launch through a third-party token launchpad (platform to be announced), rather than a direct team-run sale
Utility	Platform participation, fee benefits, staking, and governance signaling — see "Token Utility" below

The token is not intended to represent equity, ownership, a claim on profits, or a right to revenue from any entity. It should not be purchased with an expectation of profit derived from the efforts of others.

Token Utility

Beyond its role as a community identity marker, \$ARCY is intended to carry functional utility within the platform as it is built out. Planned and potential utility includes:

- Platform access — unlocking participation in ARCY-built tools, community features, and experiences as they ship.
- Fee benefits — potential discounts or rebates on platform-related activity, if and when such mechanisms are adopted by the community.
- Staking and rewards — opportunities to stake holdings in exchange for participation rewards tied to platform activity.
- Governance signaling — using holdings to weigh in on community proposals, as described in Section 9.
- Ecosystem rewards — eligibility for ambassador incentives, creator grants, and community campaign rewards funded from the treasury and ecosystem allocations.

These utilities are illustrative of the platform's direction, not commitments with a fixed delivery date. Each utility, once built, will be documented and published to the community before it goes live, and none of them are structured or marketed as a mechanism for generating profit from the efforts of others.

Platform & Products

The ARCY ecosystem is intended to grow beyond the mascot and token into its own suite of products for the Arc community, including:

- Launchpad — a native launchpad for creating and trading new tokens, with pairing support intended to extend beyond crypto-to-crypto pairs to tokenized stocks and other real-world assets (RWAs).
- Trading Terminal — a dedicated interface to swap any token into any token, across chains (Arc included), trade, provide liquidity, trade perpetuals, and track positions and markets across supported assets.

- NFT Marketplace — a venue for minting, buying, and selling NFT collections tied to the ARCY brand and the broader Arc ecosystem.
- Market Analytics — real-time charting, liquidity, and market-data tooling in the spirit of tools like Dexscreener.
- ARCY Superapp — a unified app bringing trading, portfolio tracking, and social discovery together, comparable in spirit to platforms like fomo.fund and gmgn.ai.

Swap. Trade. Provide liquidity. Trade perps. Launch your token.

One layer. All markets.

Each of these products is a development goal, not a current feature. Availability, functionality, and timelines depend on engineering capacity, funding, and regulatory review, and should not be treated as commitments. Where a product would involve regulated instruments — for example, tokenized stocks or other real-world assets — the project intends to obtain independent legal review before launch to confirm any required licensing or registration, consistent with the Whitepaper's Legal & Regulatory Considerations.

9. Governance

Longer-term decisions are intended to move progressively toward community participation rather than remaining with a small founding group indefinitely. Potential governance topics include:

- Community campaign funding
- Partnership approvals
- Treasury spending initiatives
- Brand collaborations
- Event funding

10. Roadmap

Phase One — Foundation

- Brand launch
- Website
- Litepaper publication
- Social channel setup
- Initial community formation
- Token generation event via a third-party launchpad

Phase Two — Community Growth

- Daily content cadence
- Meme competitions
- Ambassador program launch

- Educational resource library
- Builder interviews
- Trading Terminal — alpha release
- Market Analytics tooling — alpha release

Phase Three — Ecosystem Participation

- Community events
- NFT Marketplace launch
- Launchpad — public beta for community token creation and trading
- Creator grants
- Cross-community collaborations
- Governance experimentation

Phase Four — Long-Term Expansion

- Merchandise
- Global community meetups
- Expanded educational initiatives
- Broader ecosystem partnerships
- ARCY Superapp launch, unifying the Trading Terminal, Market Analytics, and NFT Marketplace
- Tokenized stocks and RWA pairing on the Launchpad, subject to independent legal review

Roadmap phases are directional and not time-bound commitments. Delivery depends on community capacity, funding, and market conditions. Product items listed above (Trading Terminal, Market Analytics, NFT Marketplace, Launchpad, and ARCY Superapp) are development goals described in "Platform & Products" above — sequencing may change, and any item may be delayed, altered, or dropped as the project's engineering and legal review progresses.

11. Security

All community members are encouraged to:

- Verify official communication channels before acting on any announcement.
- Be cautious of phishing attempts and impersonation accounts.
- Use a dedicated wallet when interacting with new or unaudited applications.
- Avoid granting unnecessary token approvals.
- Never share private keys or seed phrases with anyone, including anyone claiming to represent ARCY.

12. Community

Builders, artists, developers, designers, traders, researchers, writers, and educators all have a role. The community is intended to grow through participation — not through speculation alone.

13. Risk Disclosure

Participation in blockchain projects, including community tokens, involves substantial risk. These risks include, but are not limited to:

- Smart contract vulnerabilities and bugs
- Extreme market volatility, including total loss of value
- Liquidity constraints, especially in thinly traded markets
- Regulatory changes that may affect the legality or trading of the token in certain jurisdictions
- Technology failures, including on the underlying network
- Counterparty risks associated with exchanges, bridges, or third-party tools

Anyone considering participation should conduct independent research and make decisions based on their own circumstances and risk tolerance. Nothing in this document should be read as a recommendation to acquire any token.

14. Closing Message

ARCY isn't trying to become another speculative token launch. It's an attempt to build a recognizable community around creativity, education, and participation, using the Arc ecosystem as inspiration.

Infrastructure builds ecosystems. Communities give them life.

Welcome to ARCY.
